Plexicushion® 

The advantage in sports surfaces

The Plexicushion System combines the consistent bounce, sure footing and outstanding durability of Plexipave with innovative shock absorbing properties of EPDM rubber cushioning. The result is a surface that dramatically responds to body impact and reduces fatigue on players legs, knees, ankles & feet. The multi layered resiliency lengthens the biomechanical life of players of all ages, from juniors who are just starting to play competitively right through to seasoned senior players.

The Plexicushion substrate. a special blend of latex, rubber and plastic particles form a resilient layer that absorbs body shock and reduces muscle fatigue. The 100% acrylic Plexipave surface provides consistent and uniform bounce, long-lasting colour and allows speed of play specification.

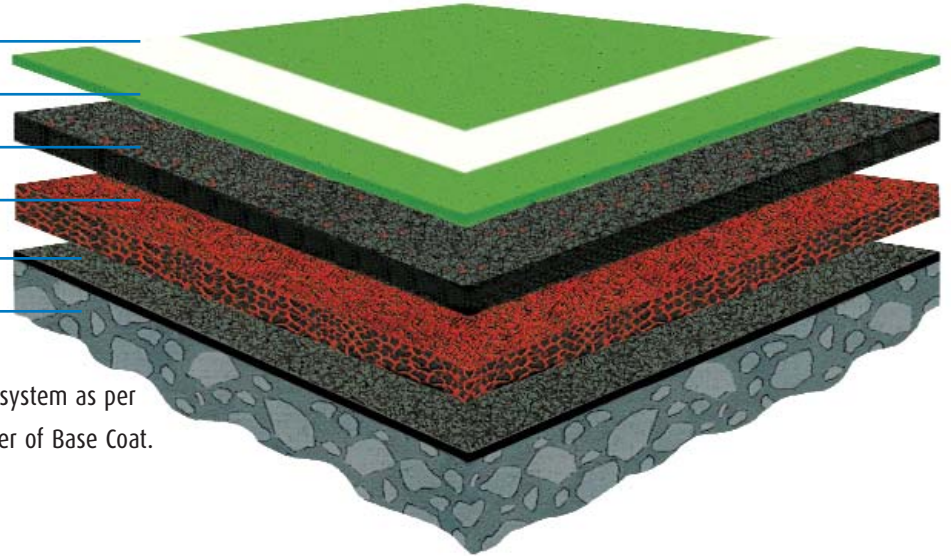

- Increases health and longevity for players of all ages
- Adjustable level of cushioning
- Leading UV formulation protects pigmentation against colour fading
- Manufactured with post-industrial recycled materials
- Can be customised to all ITF Pace Ratings

Plexicushion Tournament specifications

- Plexicolour Line Paint
- Fortified Plexipave
- Plexicushion - 3 layers
- Plexicushion Base Coat - 2 layers
- Acrylic Resurfacer
- Concrete or Asphalt

- Identical design to the industry-leading Prestige system as per below, affordably constructed by removing one layer of Base Coat.
